STATEMENT OF EVALUATION

IEE evaluations and assessments are based on the judgment of evaluators experienced in international education, a review of current literature, and documentation provided. We are members of NACES (National Association of Credential Evaluation Services), AACRAO (American Association of Collegiate Registrars and Admissions Officers), TAICEP: The Association for International Credential Evaluation Professionals, and NAFSA: Association of International Educators. The evaluation methodologies used at IEE include both year-counting and benchmarking—a detailed description of both models is available on our website. Implementation of these is dependent upon the report's purpose and the receiving organization. IEE will prioritize years of full-time study as foundational to the equivalency determination for immigration and licensure purposes, as well as for reports created for specific colleges and universities which have opted out of benchmarked equivalencies. For most education and employment reports, however, IEE will prioritize academic and professional access, curriculum rigor, and contact hours as central to the equivalency determination. This evaluation is simply advisory and is in no way binding on any institution, agency, or organization, each of which has the authority to make decisions that it chooses regarding the application of this analysis.
